PRESS RELEASE, Feb 2010

MK Sound 950 Surround Loudspeaker System

Earns THX Select2 Seal of Approval

When MK Sound introduced the all-new 950 loudspeaker system, expectations naturally ran high for a system of such distinguished pedigree, slotted to fit in the range between the acclaimed 750 THX Select system and the legendary 150 THX Ultra system.

Now, in acknowledgment of its exceptional qualities, the 950 system has been awarded the THX Select2 seal of approval. THX Select2 certification is independent confirmation that the 950 system delivers controlled directivity and a full soundstage with precise imaging for all types of audio content. In fact, the 950 system meets and exceeds THX Select2 specifications for flat on-axis frequency response, wide and even horizontal dispersion and coverage of a large listening area with consistent tonal character.

Consisting of the LCR950 main speakers and the SUR95T surround speakers, the 950 THX Select2 system proudly lives up to the MK Sound tradition as The Choice of Professionals *and* Perfectionists.

THX Select2

The original THX program was created to ensure that movie theaters meet strict quality standards. The THX logo immediately became recognized as a seal of approval for quality-conscious cinema-goers around the world.

For home theater components, independent THX Select2 certification is granted only after extensive testing to ensure the best possible sound quality in rooms where the distance from the listening position to the screen is between 10 and 12 feet.

For further information on the 950 THX Select2 loudspeaker system, contact MK Sound at lkj@mksoundsystem.com or visit www.mksoundsystem.com.
